EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Wilson on March 19, 2007.

The application has been amended as follows:

Claim 28: insert "determining propagation delays from the normalized contents of the frame position registers;" after line 6.

Claim 28: replace "the longest propagation delay" in line 10 with "the largest propagation delay".

Allowable Subject Matter

2. Claim 15, 16 and 28 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method for hitless rerouting in composite switches. The prior arts in the record also fail to teach or make obvious to a method comprising the controller storing a value in the first read pointer based on the contents of the first frame position register and the second frame position register and storing a value in the third read pointer based on the contents of the third frame position register and the fourth

frame position register within a structure of the claim. These features are claimed in the independent claims 15 and render it allowable. The prior arts in the record also fail to teach or make obvious to a method comprising normalizing the contents of the frame position registers, determining the largest propagation delay from the normalized contents and determining port-specific offsets for read pointer offset registers of the multiple SONET/SDH switches as a function of the longest propagation delay and writing the port-specific offsets into the read pointer offset registers within a structure of the claim. These features are claimed in the independent claims 28 and render it allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clemence Han whose telephone number is (571) 272-3158. The examiner can normally be reached on Monday-Friday 9 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu can be reached on (571) 272-3155. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
